

CELEBRATION OF
SFU
AUTHORS

MARCH 26, 2025
2024 PUBLICATIONS

MESSAGE FROM THE DEAN OF LIBRARIES AND UNIVERSITY LIBRARIAN

It is an absolute honor to join Simon Fraser University's extraordinary community, one that thrives on creativity, innovation, scholarship, and engagement. As the new Dean of Libraries, I am deeply inspired by the remarkable talent and intellectual energy that define SFU. This is a place where ideas take shape in ways that enrich, inform, and challenge the world around us, and I couldn't be more excited to be part of it.

The 19th annual Celebration of SFU Authors highlights the breadth and depth of scholarship, artistry, and knowledge creation within our community. This year, we recognize over 153 works spanning diverse fields including education, statistics, history, criminology, sound design, and environmental studies. These works take many forms: academic research, poetry, fiction, children's literature, long-form podcasts, and musical compositions, each a testament to SFU's dynamic and interdisciplinary spirit.

Hosting this celebration is a privilege for the Library, and I am thrilled to share this special occasion with all of you. To every author, artist, and scholar whose work we honor this year, heartfelt congratulations! Your contributions inspire us all.

Thank you for being part of this vibrant and engaged community.

I look forward to celebrating many more achievements together!

A handwritten signature in black ink, appearing to read 'Gohar', written in a cursive style.

Gohar Ashoughian
Dean of Libraries and University Librarian

The list includes publications by SFU students, staff, alumni and current and retired faculty from January 1, 2024 to December 31, 2024.

We regret any discrepancies or omissions.

Gabriela Aceves Sepúlveda

Associate Professor, Interactive Arts & Technology

- sun, prOphecy, et al. *Mitochondrial Ontologies: Deep Time and the Digital*. criticalmediartstudio, 2024.

Ben Adcock

Professor, Mathematics

- Adcock, Ben, et al. "Learning Smooth Functions in High Dimensions: From Sparse Polynomials to Deep Neural Networks." *Numerical Analysis Meets Machine Learning, vol. 25*, edited by Siddhartha Mishra and Alex Townsend, North Holland, 2024, pp. 1–52.
- Adcock Ben, et al. *On Efficient Algorithms for Computing Near-Best Polynomial Approximations to High-Dimensional, Hilbert-Valued Functions from Limited Samples*. EMS Press, 2024.
