Brainstorming

Think of Keywords that describe your research concepts

- “human trafficking?”
- “who” is being trafficked?
- “where” they trafficked?

Words that describe “trafficking”

- Child trafficking
- Forced labor**or**
- Forced lab**our**
- Human slavery
- Human smuggling
- Slave labour
- Labor trafficking
- Trafficking

Words describing “global political economy”

- “Global political econom*”
- Neo-liberal*
- Neoliberal*
- Capitalis*

Search techniques

Truncation (wildcard)

In many databases, words can be “truncated” with an asterisk (*)

- **traffick*** will find **trafficking**, **trafficked**, **trafficker**, **traffickers**

It is the same as if you search in this way:

traffick OR trafficking OR trafficked OR trafficker OR traffickers

A phrase can be searched using quotation marks (“”) around the words

- “human trafficking”
 - This ensures that the two words are next to each other, and in that order
 - This is a useful to use if there are too many irrelevant items in the search results

Phrases can also be “broken up” into separate words, and searched using Boolean logic (OR, AND)

- Forced labor
forced **AND** (labor **OR** labour)
- Human trafficking
human **AND** traffick*

Useful when there are too few items in the results list.

Combine concepts

(slave* **OR** traffick* **OR** **anti-traffick*** **OR** forced)

AND

(human **OR** person **OR** persons **OR** child* **OR** women
OR men **OR** labor **OR** labour)

AND

(neo-liberal* **OR** neoliberal* **OR** capitalis* **OR** “global
political econom*”)
